PERSONAL PROFILE

Web Developer and Data Analyst with expertise in building responsive websites, cloud-based systems, and data dashboards. Skilled at combining UX research with analytics to deliver user-centered platforms and measurable performance improvements. Adept at collaborating with cross-functional teams and driving data-informed decisions

KEY ACHIEVEMENTS

Boosted sales by 7% with a CRM I built and integrated with campaign strategy.
Recognized Employee of the Month three times consecutively (St. Anthony Of Padua school 2018).

PROFESSIONAL EXPERIENCE

Role: Research & Data Analyst

Company: KLM Royal Dutch Airlines

Location: Accra, Ghana 2024 - present

- Conducted in-depth research to gather and analyze passenger data, travel preferences, and pain points throughout the customer journey.
- Utilized statistical tools and techniques to identify trends in booking behavior, flight satisfaction, and service feedback.
- Translated complex datasets into actionable insights to support strategic decisions in customer experience, route optimization, and marketing.

- Developed comprehensive analytical reports and presented findings to management and cross-functional teams, influencing key service improvements.
- Led usability testing sessions for digital booking platforms and customer service tools to validate hypotheses and enhance user interfaces.
- Collaborated with teams in operations, sales, and customer service to implement data-informed strategies that enhanced passenger satisfaction and operational efficiency.

Role: UX Researcher & Digital Analyst

Kava Media | Accra, Achimota | 2020 – 2021

- Conducted end-user research and behavioral studies
- Collaborated on UI/UX adjustments for digital media platforms
